

## Red Cross Collections Proceeding

From the beginning of this global war, the Canadian Red Cross has, through the support of its loyal volunteers, shouldered the responsibility of caring for the wounded and needy, bringing comforts and supplies to the Armed Forces; seeing to it that dried blood serum is available on all battlefronts, and turning out clothing and surgical supplies in astronomical quantities.

Now, with the most critical phase of war looming up, there is a call upon the energies and resources of Canadian Red Cross workers, unique in all history. It is not only for the crisis at hand, but vast preparations must be made, but for the aftermath.

For Canadian Red Cross services, contrary to some erroneous belief, will not ease down after the battle is won. — the Armistice signed. — they may the drain upon resources will be expanded many times over.

This is not like the last Great War when some of the soldiers in Europe went unsheltered. Europe is devastated — ravaged — stripped of its possessions as by a swarm of locusts. The peoples of Europe are homeless — their possessions are what they can carry in their pockets. — or a pitiful handful.

Not one item of supply turned out by Canadian women volunteers in Canadian Red Cross workrooms shelt go to waste. Every scrap of material available will go toward the making of clothing and hospital supplies and all the rest of it necessary to get just everyday living.

The Canadian Red Cross is asking for ten million dollars. This money will be dispensed with scrupulous care. It will be made to go a very long way. When you give — give for now — and what comes after.

The Canadian Red Cross needs your help. Be generous when the local committee call on you for your donation.

## FLYING FRENCHMEN WALLOP GLEICHEN BY A SCORE OF 7-0

In a bang-up hockey game Saturday night the Flying Frenchmen of openly defeated Gleichen 7-0. The ice was in a very poor condition owing to skating during the day and the soft weather which prevented any flooding of the ice. The poor ice prevented much of the combination plays from clicking and caused many a pile up of boys.

Judging by the way some of the boys, on both teams, play there is some excellent hockey material in sight for the year to come. The Flying Frenchmen had two goals in the first; two in the second and four in the fourth, and their goalie did himself proud when he made a complete shutout. 2 goals were made by Gibeau; McArthur 1; Gibeau 1; Spring Chief 2; Simard 1.

The referees, Monksy Service and Lloyd Riddell did a very good job. Four hours' duration, and their uniforms and civilian clothes worn by the players on both teams.

## Town & District

The G.O. Spotted Eagle of the Blackfoot Reserve was home for a four hour duration, and their George took a youth training course in 1941 and went to work in the large carpenter plant at Fort William and from there he returned in the spring of '43, George has been at army schools in Ontario as well as Manitoba. He is a smart looking soldier.

A. J. MacArthur, Mrs. P. Edwards and Mrs. G. W. Lyons attended the Red Cross meeting in Calgary last week. The represented the local branch of the Red Cross Society and report they saw and heard much about the work done and to be done by the society.

B. Schrier informs us that his son Edwin, has enlisted in the active army.

A Gleichen man tired of standing in line to get a meal in a city suggests that the Federal Government open restaurants. Did he ever try the Government's food and requests for priority materials?

Canada has resumed the manufacture of washing machines but we know some who would be happy if they could land an old-fashioned typewriter.

Sgt. P. E. Harrison, R.C.A.F. has been spending his leave in the district visiting relatives and friends. For sometime past he has been located at Vancouver.

P. O. Evans left Sunday for Vulcan where he will set as an instructor in navigation with the airforce. There is now quite a colony of former Gleichen lads in the Vulcan school, including J. Gilbert, R. Leggett, and B. Brown.

Mrs. J. B. Leggett of Calgary has been spending a few days in town visiting her daughter, and Mr. and Mrs. A. Menard, Sunday they all paid a visit to Vulcan ostensibly to see P. O. Leggett and wife but really to see their baby.

## SUCH BRAGGING IS NOT NECESSARY

With pontifical profundity as official high in the Canadian life has told us that "the Canadian soldier is the best in the world." Which suggests to us that some of our public officials want to grow up.

Of course, we are not suggesting that the Canadian soldier is less than the best. Comparisons are odious at any time, but when we try to compare one's own soldiers with those of our allies it is even more odious than usual. There are, however, two things about this statement that are worth commenting on.

First, if Canadian soldiers are the best in the world, it is because they are so good around bragging about it. That's as extinct as the dodo bird, and out of fashion for a country which has reached maturity and is nationhood.

Second, if Canadian soldiers are the best in the world, the work is as well as not to make wild claims. Canadians are proud of their soldiers. They have done, and will do a gallant job in this war, but we know they are the type of men who want to be pat on the back all the time and (Continued on another page)

## Items From The Battery

(By Battery Reporter.)

The unit has lost the services of B. M. Ted Boos, who has gone on active service. B.S.M. Boos was a highly qualified artillery instructor and did good work not only in this unit but throughout the 41st regiment. We wish him every success and good hunting wherever he is sent. B.S.M. J. J. Dow of the instructional staff 41st Regiment, Calgary, replaces B. M. Boos in this unit. Dow is a veteran of the last war and has been on active service throughout this war. He is highly qualified and will, no doubt, prove a popular and efficient instructor here.

The improved military situation and the increased efficiency achieved was responsible for the recent changes in the Reserve Army set-up. Under the new scheme announced by National Defence Headquarters at Ottawa, the annual training time for reserve army units has been lowered from forty days to thirty, including a 15 day summer period. In addition, it was announced there would be some minor changes in the training of personnel of administration and training of personnel, which would improve the efficiency of the Reserve Army routines.

Three of the four Dow brothers who were members of this unit are on active service overseas and on of them is in the Mediterranean zone. This is a pretty good record to be sure.

There will be many soldiers turned from this summer training course. They will be sent to National Defence Headquarters Army camps and stations are to encourage personnel to grow their own vegetables in plots provided and equipped by the Army. The men, who will undertake the work a voluntary basis, will be asked to concentrate on beets, carrots and potatoes, to alleviate the strong market demand on this produce.

WRITTEN SPECIALLY FOR THE WEEKLY NEWSPAPERS OF CANADA BY JIM GREENHALG, Editor of THE SUN

Through the length and breadth of the nation there are few who haven't some relative, man or woman, somewhere in the armed forces and it's only natural that everyone is concerned with their future when the guns stop booming. Certainly they've got to stand on their own feet to a great extent to preserve their own self respect and independence but in view of their services to our country the state has some responsibility for their rehabilitation. That got me thinking that right here in Ottawa, of course, is the answer to problems which have been maybe bothering people.

I have heard of the Canadian Veterans Rehabilitation Plan, but didn't know much about it, figured most people would know it either, so I struck off to see E. B. Reid, superintendent of public for the Department of Veterans and National Health who got from him a clear picture of just what is being planned for the men and women returning to civil life under government auspices.

The whole very important Plan had to be a blueprint first but some of it is at work already. Apparently they tackled the problem in a very keynote idea that the "job" is the

Before getting into the meat of the

thing let me add that these allowances except in out-of-work cases can be applied for within 18 months after discharge or the end of the war. The out-of-work ones are paid only within 18 months after discharge.

The vocational training phase of the plan seems to me to hit the jackpot. There are no strings attached to the offer in this war, so there's no use starting to think "they didn't do this or that" in the last one. Any service man or woman, the plan definitely states, is entitled to vocational training on the basis of period of service, if he will be benefited by it, for a minimum of 13 months. Fields of employment are now being vigorously explored and plans, I am told, are laid by which they expect more than 60 percent of those discharged from the services will go into industry to be trained in various fields. There will be sympathetic guiding and that to me seems another highlight of the plan.

It might be well to add let anyone think the Plan is just in the mind yet back plans of the program are operating already with more than 6,000 having benefited and some 20,000 getting training. Last reports indicate that in connection with those whose university education had been interrupted by enlistment, some 75 are back in the universities, some 75 are back in the universities, some 75 are back in the universities.

Now let's get down to earth. That means to the land, where most people in Canada directly or indirectly are rooted. Thousands of those returning will have no other thoughts in mind than to be independent farmers — others, primary producers or fishermen, as their dads were before them. What about them, I asked Mr. Reid. "The answer lay in the Veterans (Continued on another page)

## Apply NOW for your New Gasoline Licenses and Ration Coupon Books

On March 31, the present gasoline licenses and ration coupon books will expire. After that date no gasoline will be sold except on the presentation of a 1944-45 ration book.

In his own interests, every vehicle owner is asked to apply for a new license and ration coupon book for the year ending March 31, 1945. Application forms must be completed in advance.

Commencing April 1, under the 1944-45 rationing plan, the operation of which will be basically the same as that now in effect, all non-commercial vehicle owners will again be allowed a basic "AA" gasoline license and ration coupon book, containing 40 units for a passenger car, or 16 for a motorcycle.

Similarly, owners of vehicles eligible for a "Special" category, who can prove their need, will be granted an extra vocational allowance, fixed in advance for the year ending March 31, 1945. In determining the extra allowance — which will be measured to individual needs — the previous category and mileage of the car will not necessarily be an important consideration.

The extra vocational coupon will again be issued in books labelled "Special", and each book will contain not more than 60 units. To permit constant review of the needs of each category applicant, only one "Special" book, or portion thereof, will be issued at a time. The Oil Controller also has the right to issue an additional "Special" category, or to suspend any ration coupon book for an infraction of the regulations.

The shortage of gasoline is still acute. Do not apply for a "Special" category unless your need is very urgent.

Gasoline for commercial vehicles will again be rationed. To assure themselves sufficient gasoline to carry on normal business activities after March 31, operators of commercial vehicles are urged to complete *at once* and in *detail* the required application for each of their vehicles.

On and after April 1, service station attendants will not accept gasoline ration coupons unless the license plate number of the motor vehicle for which they were issued is *written in ink* on each coupon. Every motor vehicle must also display on its windshield a 1944-45 sticker indicating the category of the coupon book submitted at the time of the purchase.

If the owner of a motor vehicle sells, transfers or disposes of it in any way, it is his obligation to see that the gasoline license and ration coupon book for that vehicle is returned immediately to the nearest Regional Oil Control Office.

To obtain a gasoline license and ration coupon book, secure an application form at your nearest Post Office. Study the form and follow carefully the instructions contained therein.

When you receive your 1944-45 gasoline ration book, guard it carefully. Do not leave it in your car. If, because of your negligence, it is lost or stolen, it may not be replaced.

## CANADA IS SHORT OF GASOLINE · USE YOUR COUPONS SPARINGLY

A man naturally feels for a pretty girl like in Africa in the dark.

## "YOUR BREAD IS TOPS!"

# OUR COMPLETE SHORT STORY—GOOD-BYE, MR. GABRIEL

By WATKINS E. WRIGHT

McClure Newspaper Syndicate

Anne Wallace stuck a finger in her ear to shut out the racket Mr. Gabriel was making, and looked appealingly across the breakfast table at her very new husband. He grinned at her and said, "Pretty awful, isn't it, honey?"

"The terrible," she said. "I can't stand it any longer. I didn't sleep all night, and now he's begun all over again. Darling, would you just get out of here!"

"Good! Anne, how can we do that?" Ben looked distressed.

"We could kill him, and—send him to the trumpet," suggested Anne suggestively.

"Kill him?" Ben said. "No, we would never be able to eat him. He's probably heavier than shoe leather."

"He's such an old guy. Besides, Aunt Lucy gave him to us for a wedding present, and besides, the finest Plymouth Rock rooster ever hatched."

"Well, he's certainly the loudest," said Anne. "If he were blowing his trumpet, he'd trumped, he could make any more noise. Oh, darling, do we have to go to this?"

"We've tried to do some constructive thinking while Mr. Gabriel went on shattering the morning's stillness with one trumpet after another. 'No, we don't,' he said with emphasis."

"I'm driving over to Macon to see a man about renewing his insurance, and I'll take Mr. Gabriel with me. I've a hunch Daddy Diego would like to have him."

"Oh, that's marvelous, darling!" Anne exclaimed. "Mummy Diego will have to have him! We'll explain to Aunt Lucy somehow. If it's ever necessary."

"No sooner said than done!" And when Ben departed shortly thereafter with his rooster, Mr. Gabriel went in a box, he preened himself, unconscious that his young owners were hiding him good-bye forever.

"Was Mummy Diego glad to have him?" Anne asked when Ben returned, that the rooster.

"Ticked pink," said Ben. "She turned Mr. Gabriel loose among her hens, and did the old boy do some strutting?"

"Thank goodness!" said Anne. "Now maybe we can get some sleep."

"They did get some sleep—three nights of it. And then the telegram came. Aunt Lucy announced she was coming to spend the weekend. Anne looked at Ben. Ben looked at Anne.

"Suppose she asks for Mr. Gabriel?" said Anne.

"That's something all right," worried Ben. Suddenly Anne beamed. "Oh, I've splendid idea!"

"You go right out to Mummy Diego's, and tell her we want to borrow Mr. Gabriel for a few days. We can send him back to her after Aunt Lucy goes home."

"Gosh, honey, that is an idea! I don't have to work Saturdays, and I'll have that old rooster back in his coop in three shakes of a sheep's tail."

"You'd better," said Anne. "Aunt Lucy arrives at six this evening."

"A few hours later Ben was back in a cloud of fog. Mr. Gabriel wasn't with him.

"Wouldn't Aunt Lucy let you have him?" Anne wanted to know.

"No," said the family she would have given him back to me for keeps, if she'd had him. But he nearly drove me crazy with crowing, so I gave him back to a family two miles away."

"Oh, Ben, how terrible!" said Anne. "But the family she gave him to? Did you see them?"

"I did," said Ben. "But Mr. Gabriel kept his legs awake all night. So they gave him to a family called Porter."

"He waved Anne to silence as she started to speak. "Yes, the Porter family took him."

"And no Mr. Gabriel?" said Ben.

"I kept the Porter family, and the Porter's small son said his 'paw' was going to sell the rooster to the town butcher."

"Oh, dear," wailed Anne. "What- ever shall we do?"

"A taxi came to a standstill at the front gate, and out of it climbed Aunt Lucy."

"I have a favor to ask of you, my dears," Aunt Lucy said at dinner. "I want to take Mr. Gabriel home with me."

"But, Aunt Lucy," Ben began. "We can't take him. He's not here."

"I understand, my boy," said Aunt Lucy gently. "You've become attached to him. I can appreciate that."

## MUFFINS CAN HELP KEEP YOU REGULAR

Yes—by eating several delicious delicious all-day muffins every day, and drinking plenty of water, you can help prevent constipation due to lack of bulk in your diet!

**KELOGG'S ALL-DAY MUFFINS**  
 1/2 cup milk  
 1/2 cup sugar  
 1/2 cup oil  
 1/2 cup shortening  
 1/2 cup baking powder  
 1/2 cup salt  
 1/2 cup flour

Blend shortening and sugar thoroughly, then add milk, oil, and salt. Stir in flour and baking powder. Bake in muffin tins for 20 minutes at 400° F. or 30 minutes at 350° F.

All-star is made by Kellogg's in London, Canada. Your grocer has it, or a convenient mail order.

She smiled sweetly. "But I'll make it up to you. I've brought along a crisp new twenty-dollar bill for you to purchase something else."

"Oh, Aunt Lucy!" Anne, thinking of a number of things she wanted. "We can't let you do that. You see, we—she got no farther."

A sound from the rear of the house shattered the suburban silence.

"There he is now! That's Mr. Gabriel!" said Aunt Lucy reproachfully. "Come along, children, I must see him this minute."

In a remarkably short time the trio of blushing heads the cool. Aunt Lucy stooped and began carrying on a somewhat incoherent conversation with Mr. Gabriel. The she straightened, smiled and faced her nephew and his wife. "I know how attached you are to him," she said, "but I just want to see him. You'll never know how awful it is to wake up in the morning and not hear Mr. Gabriel crowing."

"Come on inside now," she went on, "and I'll get you that twenty-dollar bill. I saved it in my petticoat. You never know what may happen in a big crowd."

**WAR SAVINGS STAMP RECIPE**

All across Canada this month, the Food Industry has undertaken the ambitious task of selling two million dollars worth of War Savings stamps.

When you patronize your local merchant, you will have the opportunity of helping along the war effort by purchasing from him as many war stamps as you possibly can. Here is a recipe which will get a saving and will help you to buy stamps:

**SPICED POT ROAST**

4 lb. chuck roast  
 2 tablespoons salt  
 2 tablespoons cumin  
 2 tablespoons brown sugar  
 2 tablespoons vinegar  
 2 cups tomato juice  
 1 large onion, chopped  
 1 bay leaf  
 1/2 teaspoon salt

Heat the fat in a heavy deep saucepan or Dutch oven; mix together the flour, cumin, ginger and brown sugar; rub it on the meat and sear on all sides in the hot fat. Add the rest of seasonings are left to the kettle; add the tomato juice and onion. Cover and simmer gently for two hours with clear hamme, when-ever the station siren sounds.

According to the files, his real name is Rungmook Rye P'lar, son of Holles Pioneer Blue Boy and Rungmook Rhymer, both of whom came to Canada from India. Ottawa has him registered as 16460, but his Air Force number at the school is 27777.

He was raised by Col. and Mrs. J. D. Cowan of Kaslo, B.C., who first made a blue Dane champion in the British Empire and on the American continent. Now Acti Rada is keeping up the tradition, with awards from shows across the Dominion which need only a few additional services to qualify him as a Canadian champion.

**British Scientists**

Discover Method To Double The Size Of Fruit And Vegetables

In a laboratory outside London, British scientists have discovered a way to double the size of fruit and vegetables, and of flowers, and to increase their quality and their ability to resist disease. The means they have used is the colchicine drug, and the method is described as giving an "aneuploidic" effect to the seed. This doubles the number of life germs (chromosomes) in each seed, which has the effect of making a bigger plant of finer quality.

**MAY CHANGE LAW**

British traditional law on the side of the road driving may be on the way out. Spencer Miller, New Jersey highway commissioner just returned from Britain, said the British Ministry of Transport will recommend right-hand-side driving as a post-war project.

## "Aircraftman Radar"

Home, School And Church Is The Safeguard Of The Young

Home, school and the Church are the great triple alliance for the defense of youth, declares The Chatman Daily News. This is not artificial alliance, but a natural one; so natural one; so natural that society would not be normal without it.

Given the family as a basis of society, the school and the Church come in providentially to supplement its works, to strengthen its great purposes. All three work together with a common aim, the preparation of youth for manhood and womanhood.

It must be obvious that there should be the utmost harmony between the three members of this triple alliance, and they should always work together. It would never do for the school or Church to be put in the position of having to rebuke the family, or the parents, because of their failure to instill into the minds and manners of their children a proper idea of what is right and what is wrong.

On the other hand, normal parents who surround their children with reasonable spiritual and social safeguards at home should expect to have them seconded and approved at school and at Church.

Atmosphere is an intangible thing, but it is a great influence in life. More depends on it, in the shaping of human life and conduct, than is generally admitted. Long before children are conscious of laws, rules or conventions, they are reflecting in their minds the atmosphere, religious, moral and social, in which they live.

How often it is said, in explanation of the good or badness of a child, that he could hardly be expected to be what he was because of the atmosphere in which he was brought up.

To the above triple alliance there is assigned the task of creating the proper atmosphere in which the world of today. It is the atmosphere in which the Church and school, in union with the family, are working to develop the child to the highest degree and power. It was poor "atmosphere" that led to the various follies in Germany that followed the rejection of the Christian Church by Nazi authorities. This triple alliance must be maintained by all men and must permeate peace discussions if war is ever to be banished from the earth—St. Catharines Standard.

**Big Blue Mascot**

Altaircraftman Radar Of Royal Canadian Air Force

ACI Radar is a model member of the R.C.A.F.

He lives his station and everybody in it.

He is particularly fond of his flight sergeant.

And he has never been known to complain about anything.

The fact that he is a Great Dane may have something to do with this, but he never knows what may happen in a big crowd.

He must be almost two hundred pounds of bone, brawn and enthusiasm; the whole done up in appropriate Air Force color—the blue that is rare among Great Danes.

The big blue mascot enlisted last September, and made his first appearance at the Commanding Officer's parade, since when no parade is complete without him. He was proud approval as "WAGS" receive their Air Gunner's wing; he surveys each march past with a critical eye, and is always ready to take senior officer's hat for a little fresh air and exercise on the other end of his leash.

His quarters and office are at the station fire hall, where his P.T. is a strenuous routine of trying to keep the fire reels on their tour. Off duty, he is interested in voice culture, and goes with clear harmonies whenever the station siren sounds.

According to the files, his real name is Rungmook Rye P'lar, son of Holles Pioneer Blue Boy and Rungmook Rhymer, both of whom came to Canada from India. Ottawa has him registered as 16460, but his Air Force number at the school is 27777.

His quarters and office are at the station fire hall, where his P.T. is a strenuous routine of trying to keep the fire reels on their tour. Off duty, he is interested in voice culture, and goes with clear harmonies whenever the station siren sounds.

According to the files, his real name is Rungmook Rye P'lar, son of Holles Pioneer Blue Boy and Rungmook Rhymer, both of whom came to Canada from India. Ottawa has him registered as 16460, but his Air Force number at the school is 27777.

He was raised by Col. and Mrs. J. D. Cowan of Kaslo, B.C., who first made a blue Dane champion in the British Empire and on the American continent. Now Acti Rada is keeping up the tradition, with awards from shows across the Dominion which need only a few additional services to qualify him as a Canadian champion.

Discover Method To Double The Size Of Fruit And Vegetables

In a laboratory outside London, British scientists have discovered a way to double the size of fruit and vegetables, and of flowers, and to increase their quality and their ability to resist disease. The means they have used is the colchicine drug, and the method is described as giving an "aneuploidic" effect to the seed. This doubles the number of life germs (chromosomes) in each seed, which has the effect of making a bigger plant of finer quality.

**MAY CHANGE LAW**

British traditional law on the side of the road driving may be on the way out. Spencer Miller, New Jersey highway commissioner just returned from Britain, said the British Ministry of Transport will recommend right-hand-side driving as a post-war project.

## MAKE YOUR OWN CIGARETTES WITH

Home, School And Church Is The Safeguard Of The Young

Home, school and the Church are the great triple alliance for the defense of youth, declares The Chatman Daily News. This is not artificial alliance, but a natural one; so natural one; so natural that society would not be normal without it.

Given the family as a basis of society, the school and the Church come in providentially to supplement its works, to strengthen its great purposes. All three work together with a common aim, the preparation of youth for manhood and womanhood.

It must be obvious that there should be the utmost harmony between the three members of this triple alliance, and they should always work together. It would never do for the school or Church to be put in the position of having to rebuke the family, or the parents, because of their failure to instill into the minds and manners of their children a proper idea of what is right and what is wrong.

On the other hand, normal parents who surround their children with reasonable spiritual and social safeguards at home should expect to have them seconded and approved at school and at Church.

Atmosphere is an intangible thing, but it is a great influence in life. More depends on it, in the shaping of human life and conduct, than is generally admitted. Long before children are conscious of laws, rules or conventions, they are reflecting in their minds the atmosphere, religious, moral and social, in which they live.

How often it is said, in explanation of the good or badness of a child, that he could hardly be expected to be what he was because of the atmosphere in which he was brought up.

To the above triple alliance there is assigned the task of creating the proper atmosphere in which the world of today. It is the atmosphere in which the Church and school, in union with the family, are working to develop the child to the highest degree and power. It was poor "atmosphere" that led to the various follies in Germany that followed the rejection of the Christian Church by Nazi authorities. This triple alliance must be maintained by all men and must permeate peace discussions if war is ever to be banished from the earth—St. Catharines Standard.

**Big Blue Mascot**

Altaircraftman Radar Of Royal Canadian Air Force

ACI Radar is a model member of the R.C.A.F.

He lives his station and everybody in it.

He is particularly fond of his flight sergeant.

And he has never been known to complain about anything.

The fact that he is a Great Dane may have something to do with this, but he never knows what may happen in a big crowd.

He must be almost two hundred pounds of bone, brawn and enthusiasm; the whole done up in appropriate Air Force color—the blue that is rare among Great Danes.

The big blue mascot enlisted last September, and made his first appearance at the Commanding Officer's parade, since when no parade is complete without him. He was proud approval as "WAGS" receive their Air Gunner's wing; he surveys each march past with a critical eye, and is always ready to take senior officer's hat for a little fresh air and exercise on the other end of his leash.

His quarters and office are at the station fire hall, where his P.T. is a strenuous routine of trying to keep the fire reels on their tour. Off duty, he is interested in voice culture, and goes with clear harmonies whenever the station siren sounds.

According to the files, his real name is Rungmook Rye P'lar, son of Holles Pioneer Blue Boy and Rungmook Rhymer, both of whom came to Canada from India. Ottawa has him registered as 16460, but his Air Force number at the school is 27777.
